EARLY BIRD BOOKINGS AVAILABLE

Sandton Convention Centre

Maude Street Sandown | 2146 Johannesburg | South Africa

Parking

There are nearly 11 000 parking bays available in the adjacent Sandton City and Nelson Mandela Square malls ensuring that parking your car is never a problem. Three hundred parking bays are available directly under the centre. A unique logistics management system for on- and off-loading further limits traffic congestion. The road capacity of the façade street of the building has been increased by introducing right-turning lanes. Entrance into Sandton Convention Centre parking is from Alice Lane between West and 5th Streets.

Airport

The Sandton Convention Centre is a mere 25 minutes by road or 15 minutes by Gautrain from O.R.Tambo International Airport, the country's leading air terminal, serving 30 000 travellers daily. Airport-approved operators provide taxi, bus and shuttle services between Sandton and the

terminal. For further information contact the O.R.Tambo International Airport on 086 727 7888.

Roads

Sandton is 25 minutes by car or bus from O.R.Tambo International Airport. Airport-approved operators offer taxi, bus and shuttle services to all major centres within a 500 km radius. Hotel courtesy buses transport guests to and from the airport. A wide variety of transport is available in the region, ranging from budget car rental through to luxury transport, such as limousine chauffeur services. The whole region enjoys exemplary road infrastructure and clear signage.

Meeting planners may wish to appoint a transport company to provide a dedicated bus shuttle service for delegates. This service could include shuttles between hotels, to cater for delegates that are not staying within walking distance of the Sandton Convention Centre.

EUR MOLD

Maconcept

afrimold

afrimold will for the first time bring experts together in South Africa to share experiences in the vital area of product development, tooling and manufacture, based on the very successful formula from EuroMold in Germany.

The annual afrimold exhibition will host a conference with international and local speakers who will present varied papers on all aspects of the product development, – i. e. cycle tooling and manufacture, leading to successful launches of new products in a variety of industries.

The latest tooling technologies will be discussed, with international principals showing the very latest in machine tool technologies which are contributing a competitive edge in tooling design and manufacture.

Three Keynote addresses have been secured including Pierre
