

Foundry-Planet.com

B to B Portal for technical and commercial foundry management

FOUNDRY-PLANET LTD. • Postfach 13 08 • D-87619 Füssen

Editorial

First the financial sector went into tremor – now the real economy follows suit.

It is quite obvious that this crisis is impacting each one of the foundry- industry entrepreneurs as well as suppliers for machines and plant constructions in an entirely individual manner. I suppose you are quite capable of estimating the current break and are able to take the necessary measures for counteraction.

Ahead of us lies a certain phase, which some may call "hibernation"- yet others are indeed aware that a restructuring and revision of plans has become imperative.

It is worthwhile to be well positioned in order to operate successfully on the global market.

www.foundry-planet.com is your medial companion for Foundry-Business on the internet worldwide. We are keen on reporting about innovation, strength, magnitude of the industry, about the enormously growing technology and about new chances for product development for the manufacturing sector.

It is a great advantage to profit from marketing, reference bulletin and public relations for demonstrating your skills. Choose the Internet Gateway www.foundry-planet.com as your multilingual companion.

My best wishes to you for your business development and growth. Meet the challenge you are facing together with us on your side and taste the success!

Sincerely yours,

Thomas Fritsch
