EUROGUSS 2016 – Trade Show Review

→ www.trennex.de

"We would like to thank all of the visitors who came to see us at our newly designed booth for the EUROGUSS 2016. It was a pleasure to see so many of you there."

Helmut Geiger, Managing Director

The positive feedback once again showed the increasing importance of EUROGUSS and it will be interesting to see how this will have an effect in 2018, when EUROGUSS and GIFA will both take place in the same year. Two large trade fairs for the same industry in one year? This will definitely be interesting and decisions will have to be made.

Despite the relatively early timing of EUROGUSS 2016 right after the Christmas holidays, many specialists still took time to visit what is currently the most important trade fair in die casting.

The numerous conversations that we had allow us to look optimistically towards another successful year.

Several topics were discussed, such as minimum quantity spraying and structural die casting. But many other points are also in focus and will result in us having another interesting year in 2016.

We look forward to working with you and stand ready to work with you as a competent and high-performance partner for questions concerning release agents and lubricants.
