**WS Wärmeprozessstechnik @ ITPS 2017**

WS is an owner operated enterprise which was founded in 1982. Since then, it specialized on highly efficient, low emission burner systems for industrial furnaces. Activities include research, engineering and design, production, sales and service worldwide. WS specialized on energy efficient and low emission gas heating systems for industrial furnaces. Most WS burners combine the heat exchanger for air preheating and the burner to one compact unit. All parts are completely assembled and tested to ensure a smooth installation and start up. Standardized parts assure availability of spare parts for many years.
