

IMFGROUP

a global partner
for a global foundry

IMF - No-Bake moulding plants and sand reclamation systems • IMF - Green sand reclamation plants

IMF - Foundry Automation – Core-shooters and core centers • IMF - Carlo Banfi – Shot blasting and Shot peening machines

is proud **to announce** its presence to the
international exhibition **ANKIROS 2014**

We will be happy to welcome you in

our booth D100
in Hall 6

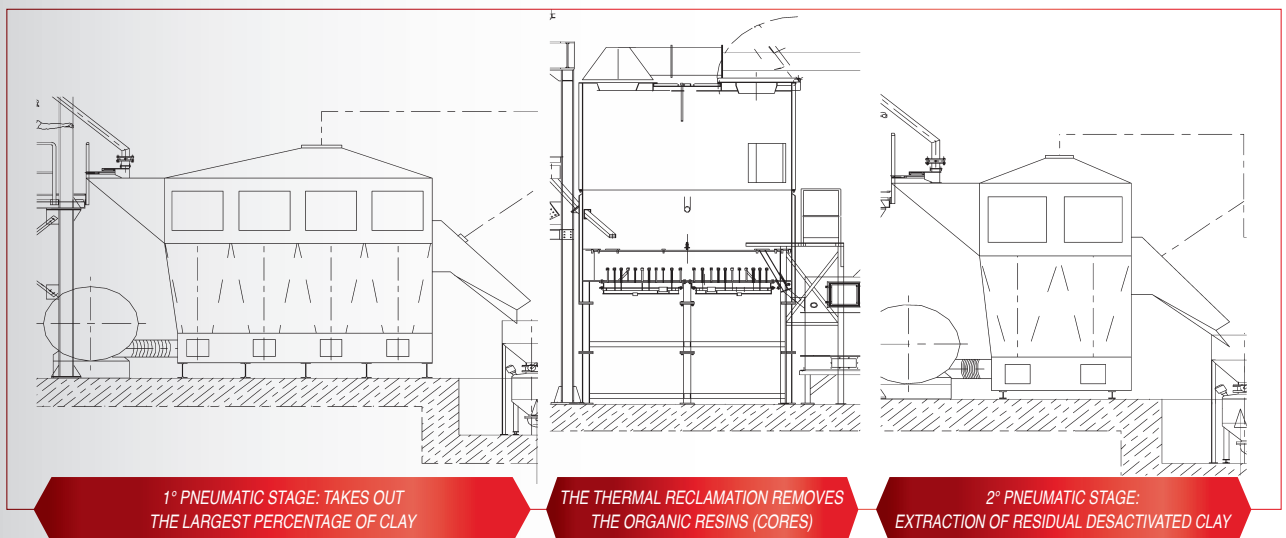

No-Bake process - Sand Castings Chemically bonded sand

Complete plants and stand-alone machines. Mixers, fast-loop (automatic moulds handling), rollovers and moulds manipulators, painting stations, core setting, closing stations, pouring area, shake-out systems, sand reclamations, sand transport.

Green sand reclamation plant

Mechanical and thermal treatment to reclaim green sand to be used for core production.
Fines percentage less than 0,1%. LOI less than 0,2% and minimum residual bentonite.

Core shooters – Cold box, Hot box, Croning

Single machines and core centers with dedicated robots

FOUNDRY
AUTOMATION

Core Shooting Machine Division

Core shooting machines from 15 liters up to 200 liters with dedicated sand preparation plant and robot for cores handling, deburring, painting and assembly.

Shot blasting machines – Shot peening machines Mechanical pickling plants

**carlo
banfi**

Shot-Blasting Machine Division

Turntable blast machines, belt tumbling machines, spinner hanger or hook machines, monorail/car shot-blasting machines, wire descaling machines, continuous pass through shot blasting machines, shot blast chambers, shot peening machines.
