costampgroup.it

We have been creating moulds for the production of thermoplastic components for over 20 years, for leading OEM and Tier1 companies. We conceived and patented the structure of the Compact Mould for vehicle bumpers.

We are **committed to meeting the needs and requirements** of the clients who use our moulds. We guarantee a quality product and optimization of production timescales. Thanks to our knowledge and expertise we have developed an efficient and reliable **production process** combining experience, technology and innovation to offer **complete, integrated solutions**.

OVERVIEW

TYPE
injection moulds

MATERIALS
thermoplastics

MARKET
automotive

DIMENSIONS
for injection moulding machines
from 160 to 400 tons

PROJECT MANAGEMENT
We manage each project phase with the utmost professionalism. We offer **complete solutions** and support for each part of the production process, from the design of the component to mass production.

DESIGN and CONSTRUCTION
The design process is carried out in **collaboration with the client** to create a product that meets required production and quality standards. We use the most up-to-date versions of market-leading software.

INJECTION and COOLING
In cooperation with established, reliable partners we offer **sampling services, pre-series, prototypes, special runs** and small to medium batches.

+ APPLICATIONS

EXTERIOR SYSTEMS

- front and rear bumpers with spoiler
- grills
- internal reinforcements

INTERIOR SYSTEMS

- I-Panels
- central armrest
- door panels and pillars (standard or back injection)

OTHER APPLICATIONS

- front-end
- AdBlue tank
- engine covers
- air channels
