

PRODUCTION PROGRAM

Here is brief list of out current production program:

- Automatic Green Sand Moulding lines;
- Core Making Machines and robot production cells (shell moulding, croning, cold and hot box, inorganic processes);
- Gas Generators for Isocure (Amine), CO₂ SO₂ and Betaset;
- Core Sand preparation, mixing and distribution plant;
- Shell moulding machines complete of automatic gluing systems;
- Amine Scrubber towers
- Hydraulic Moulding Machines, mechanised and semiautomatic green sand lines;
- Decore machines;
- Metal Treatment equipment (Ferro-Alloys, Inoculation for Nodular cast iron);
- Metal Transfer plant for automatic handling of ladders.
